DETAILED ACTION

The Examiner and Art Unit handling this Application have changed. Please direct further correspondence to Examiner Valenrod, Art Unit 1621, whose contact information is presented at the end of this Action.

Applicant's election with traverse of structure:

$$A^{1}$$

$$R^{2}$$

$$R^{3}$$

$$R^{4}$$

$$R^{5}$$

$$R^{5}$$

$$R^{8}$$

$$R^{8}$$

$$R^{6}$$

, in the reply filed on 12/19/06 is

acknowledged. The traversal is on the ground(s) that invention is directed to a family of disulfide compounds with specific physical or chemical characteristics. This is not found persuasive because the disulfide compounds represented by their generic structures in claims 8 and 20 fall into different classes/subclasses. A reference anticipation one of the structures would not anticipate the others.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which

Art Unit: 1621

applicant regards as the invention. It is unclear which R-groups are included and which excluded by the definitions of the said groups in claims 8 and 20. The claims only require that at least one R-group on each side of the disulfide group is an electron-withdrawing group. In cases where not all of the R-groups are electron withdrawing-groups, the remaining R-groups lack definition.

Page 3

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 8, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishimura et al (Yajugaku Zasshi 1964, 84(9) 797-805, STN abstract, see attached printout).

Nishimura et al disclose β , β '-dithiobis-benzeneethanamine hihydrochloride:

The said compound comprises:

- a) a disulfide bond;
- b) two electron withdrawing groups (phenyl rings)

Art Unit: 1621

c) two reactive groups (NH₂) capable of forming covalent bonds one on each side of the disulfide bond and not before the electron withdrawing group. Formation of the said covalent bond does not result in loss of the phenyl group, cleavage of the disulfide bonds, disulfide bond being cleaved more rapidly than oxidized glutathione, or the pKa of the resulting thiol being less that glutathione thiol pKa. Cleavage of the disulfide bond results in formation of two molecules.

Variables correspond as follows:

R⁴ and R⁶ are phenyl;

The rest of R-groups are H

L is a CH₂

A¹ and A² are amine groups.

Conclusion

Claims 7, 8, 19 and 20 are pending.

Claims 7, 8, 19 and 20 are rejected.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yevgeny Valenrod whose telephone number is 571-272-9049. The examiner can normally be reached on 8:30am-5:00pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
